

# CloudMigrator

## Supported Operating Systems

- Windows XP
- Windows Vista
- Windows 7
- Windows Server 2003
- Windows Server 2008

## Supported Source Platforms

- Novell GroupWise 6.5/7/8, including archives
- Lotus Notes 6.0.2 or above
- Microsoft Exchange 2000-2010, including PST archives
- Microsoft Office 365
- Scalix 11 or above
- Google Apps

## Supported Destination Platforms

- Google Apps
- Google Postini Services
- Microsoft Office 365/Exchange 2007 SP1/2010 SP1

## Software Requirements

- Microsoft .NET Framework 2.0

### GroupWise

- Novell GroupWise Client 6.5.6 or Novell GroupWise Client 7.03
- Novell Client 4.91SP4 or higher

### Lotus Notes

- Lotus Notes Client 6.0.2 or higher

### Microsoft Exchange 2000/2003

- No extra software required

### Scalix

- No extra software required

### Google Apps

- No extra software required

### Office 365/Exchange 2007/2010

- PowerShell 2.0

## MIGRATION FROM A WIDE RANGE OF MESSAGING SYSTEMS TO GOOGLE APPS, GOOGLE POSTINI SERVICES AND MICROSOFT EXCHANGE 2007/2010/OFFICE 365

*The CloudMigrator migrates all email, calendar and contacts from GroupWise, Lotus Notes, Exchange, Office 365, Scalix or Google Apps to Google Apps, Postini or Exchange 2007/2010/Office 365*

## The CloudMigrator

The CloudMigrator tool from Cloud Technology Solutions enables simple and easy migration of a Novell GroupWise, Lotus Notes, Microsoft Exchange/Office 365, Scalix or Google Apps system to Google Apps, Google Postini Services or Microsoft Exchange 2007/2010/Office 365. A very high level of configurability is provided to enable administrators to operate the migration tool in the most appropriate way for their environment. The tool supports the widest range of features across all platforms, including:

### User Provisioning and Migration

- Extract user details from the source systems
- Provision users directly from the tool as part of the Google Apps migration or using built-in PowerShell integration for Exchange2010/Office 365
- Set users initial password
- Force password change on next login
- Migration of all, or a subset, of users
- Migrate GroupWise resources to Google/Exchange 2010/Office 365

### Email Migration

- Migrate email between specified date

ranges

- Folders become labels within Google Apps, or are migrated as folders to Exchange 2007/2010/Office 365. Labels in Google Apps become categories in Exchange 2010/Office 365.
- The read state and priority of all messages is retained
- Migrate email into Google Postini services
- Migrate GroupWise, PST archives or NSF files to any destination system
- Migrate categories to Google Apps labels or Office 365 categories

### Calendars and Appointments

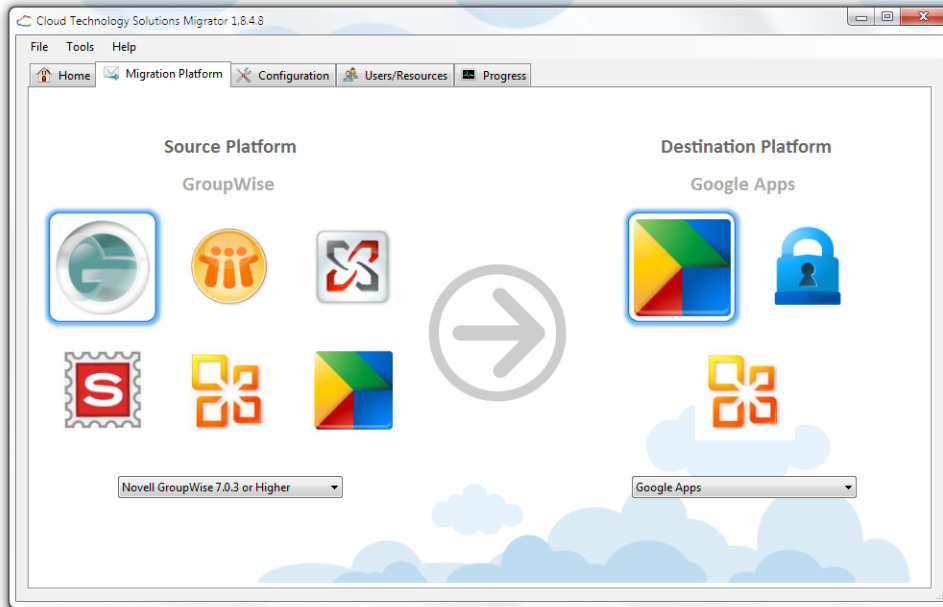

- Both main and sub-calendars can be migrated, creating main and secondary calendars within Google Apps or Office 365/Exchange 2007/2010
- Shared calendar access is transferred
- Appointment alarms are retained
- Import appointments from and to specified date ranges

### Contacts

- All contact information is imported to Google Apps or Exchange 2007/2010/Office 365 including addresses, telephone numbers, etc.

## Support and Partner Network

Cloud Technology Solutions offer a direct, full, thorough support service, or one of our partners worldwide in your area will support you every step of the way. We can also perform migrations for you if required.

## Major New Features

Recently added new features:

- Migration from Lotus Notes to all destination platforms
- Support for migration to Google Postini Services and Microsoft Exchange 2007/2010/Office 365, alongside improved support for Google Apps
- Migration from Microsoft Exchange 2010/BPOS and Office 365
- PST archive migration
- PDF report generation

## Other Features

- Simple, intuitive, yet powerful configuration interface
- Thorough and complete documentation, including advice about migration scenarios
- Proven in hundreds of thousands of real-world migrations
- Scalable to fit your needs
- Live migration statistics and feedback
- PDF migration report generation
- CSV report generation
- Platform configuration tools
- Automatic update notifications
- Detailed log files
- Trial available

## Migration Made Easy

The CloudMigrator has been used and trusted by hundreds of organizations with hundreds of thousands of user migrations. The tool can be configured to perform a migration exactly as your organization needs.

- An **immediate** migration can be performed, where data is extracted from the source system and transferred at the same time to the destination system
- A **staged** migration can be performed, where data is extracted from the source

system and then imported to the destination system following the export.

- A **backup** process, where data from a source system can be backed up and then at a later time be restored to a destination system.

The tool can also be run in several distinct ways, it can be:

- Used interactively as the primary means of configuring, controlling and monitoring a migration process
- Started from the command line, specifying a configuration file that will be used to control the run of the tool (the UI will still be displayed whilst the tools runs)
- Run on multiple workstations to enhance the performance and throughput of migrations
- Used to generate a configuration file only for use with other migration stations

It is always possible to migrate many users simultaneously, but if a large source system is to be migrated then it is possible to scale up the migration process to run multiple instances of the migration tool to ensure efficient transfer of your data into the cloud.

## Customer Feedback

Hundreds of customers have used the CloudMigrator. On average the tool is used to move over 2000 users to the cloud every week!

*Simplicity: Configure the options, configure the users, and hit Go!*

*Having done migrations before, I can say very rarely do things go as easily as this...*

*Excellent tool, outstanding customer service*

*This tool makes it simple and support was fabulous*

*If you are looking to migrate from GroupWise to Google Apps you must look into this tool*

*Using the CloudMigrator has reduced our migration time by about 35%*
